More Than Technology

Innovation 7 series

7 Series LPG Dispenser Models

7 series	Type	Statement
7.11	inovation	1 Nozzle
7.22	inovation	2 Nozzles
7.44	inovation	4 Nozzles

Advantages

- Multimedia design (fully self-contained electronics)
- Single/Dual hose configurations
- Various cabinet styles in stainless steel or powder-coated steel
- Electronic computer register with Backlit Displays
- Integrated Money and Volume electronic totalizers
- Interface availability with most POS and card reader systems
- International currency options available
- Automatic Temperature Compensation (ATC)
- Electronic Calibration
- ATM-type stainless steel keypad
- Positive Displacement Piston Meter

Monitor & Keypad

Interactive 17" LCD. ATM type keypad and a clear view with the embedded design

Spotlights

4 pieces spotlights to ensure the prominence of the colons.

3D Columns

3D designed columns. Totally unique and aesthetic.

LCD Panel

Graphic or TFT screen. Clear and vibrant images. Transition to color screen.

General

Credit card usage options
Fast data throughput with the RFID technology Using ZVA nozzle
Unit prices and data display Deepened front panel
Completely dominated oval lines
Original hydraulic parts

Service

Response to the pump remotely via Internet. The fastest service intervention
remote connection.
and the right solution with the remote connection.

General Features

General

Full multimedia support (Internet, Selling on the monitor, TV, Videos etc.)
3d designed columns
Keypad unit is made of stainless steel
Spotlighting support
The option a payable self service with credit card
RFID card interface unit
Electronic unit is designed with latest technology
Fully compatible with automation, cash registers and any multimedia (PC or Satellite) systems

Working properties

Flow Rate max-min (lpm) : 5 – 50 lpm
Operating Environment : -30 / +60 °C
Temp. Measurement Range : - 25 / +55°C
Relative Humidity : 95 %
Electronic Unit Safety : 220V, 50Hz 100 W

Flow Meter

4 piston positive displacement flow meter with sensitive adjustment capability
Accuracy : ± 0.5 %

Flow Control Valve

Monoblock two way Ex selenoid valve

Totalizers

We use 12 digits electronics totalizers for liter,money,shift-money and shift-liter, in addition to these, we use also 7 digits electromechanic totalizers according to your requests.

Electronic-Unit

Compatibility with the CANBUS technology
USB port support
Programmable electronic card
RS485 or Current-loop communication option
Compability with all the cash register
Compatibility with Savel multimedia module
Automatic electronic calibration
Compatibility with all the automation systems
1-wire and 2-wire special communication system
Card design according to the EMC tests
Menu systems in 6 different languages (Tr, En, Fr, Ar, Ru, Ge)
10 digits for electronic total

Keyboard

Solid keypad with 16 buttons made of stainless steel (ATM type)
Pre-Set Fill Keypads

Display

1" (25.4 mm) 6 digits for money, 6 digits for liter, 6 digits for unit price. Option one is a single screen.

Noozle and Hose

TS 9219 EN 1762 certified 5 / 8 "LPG hose
13' LPG hose (Lowstyle) or 15' LPG hose (Highstyle) with Safety Breakaways
